

June 11, 1980

Dear Mr. Weisberg:

I am writing you to find out how I may help in the efforts to see that the Kennedy and King assassinations are not buried from national inquiry. I believe that the Select House Committee fell short of the job that they should have done. I believe that they posed more questions than answers and if the public is not kept aware then I fear that the cases will not be explored as they should have been.

I have admired your continued efforts against great hostility from the general public. I believe as time goes along that your efforts will be vindicated.

I would especially not care to do anything other than volunteer my time which I believe is precious but I feel that time could mayable make a difference in the long run. The critics of the case have done an admir al job in presenting little known information for continued study. I believe that the search must continue for we need to be beyond theory to the time when we can give the public a set of circumstances with names to go with it to make sure that these individuals pay the full price.

Any help, and/or communication with you would I believe produce a mutual benefit to the case.

*I am R. Jones in phone
book - rather with this
phone number. No return address
on envelope, addressed to me
at RFS*

Yours Truly,

William R. Jones, Jr.
